

I have been working in kids and children education for years always on the fields and my long experience proved to be a winning card. The Tsaharoniki was established in 2012 after a complete new proposal to fulfil the community and parents needs as previous solutions changed every year. I managed a new concept and established solid and trustful relations with the parents and the village administration based on a real will to satisfy our main customers, the children. While being the only private kindergarten, the Tsaharoniki is the reference of quality and experience for all Misgav Regional Council.
